Harrison, NJ (EST) | prachigpt113@gmail.com | +1 862-231-9537

Product & Data Analytics | SQL · Python · Tableau | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Medium](#)
OPT authorized · STEM extension eligible (36 months)

EDUCATION

Pace University, Lubin School of Business — New York, NY <i>MBA, Business Analytics</i> GPA: 3.95	May 2026
Symbiosis College of Arts and Commerce — Pune, India <i>MA Economics</i> GPA: 7.5 / 10	June 2018
Delhi University — Delhi, India <i>B.Com (Hons)</i> GPA: 7.9 / 10	June 2016

RESEARCH & PRODUCT WORK

"Lost in the Learning Loop" — Independent Mixed-Methods Study	Feb 2026 – May 2026
- Ran independent mixed-methods study (survey n=20, moderated interviews n=4) on learning abandonment; identified four behavioral archetypes and isolated identity clarity as the single variable separating completion from dropout. - Translated findings into two product artifacts: a consumer Figma prototype (LINX: identity-first onboarding for LinkedIn Learning) and a B2B enterprise concept (LINX for Teams: pre-enrollment identity layer for L&D managers). - LINX for Teams deliverables: PRD with personas, user stories, MoSCoW prioritization, 30/60/90 success metrics; Agile Sprint 1 plan with story point estimates across UX Design, Frontend, Backend, and QA; UML use case and activity diagrams for three actors (Line Manager, Employee, L&D Manager); 18-screen Figma prototype across two flows. - Defined pilot metrics anchored to ATD and CIPD benchmarks: 13pp improvement in course completion, 15pp reduction in Week-2 abandonment across 80-employee enterprise cohort.	

SKILLS

Analytics & Data: SQL · Python (Pandas, Matplotlib) · R · Tableau · Power BI · Excel · Statistical Modelling · Regression Analysis · A/B Testing
Research Methods: Moderated Interviews · Survey Design · Usability Testing · UAT · Competitive Analysis · Thematic Analysis · Affinity Mapping · Mixed Methods
Product & Tools: Figma (Wireframing · Prototyping) · Salesforce CRM · HTML/CSS · User Journey Mapping · Onboarding Design · Retention Analysis · KPI Development · Requirements Gathering · PRD Writing · Agile/Scrum · Product Lifecycle · Sprint Planning · B2B SaaS
Certifications: Google Analytics Certified · Bloomberg Market Concepts

PROFESSIONAL EXPERIENCE

StoriedData Inc. (GUUT) — Data Analyst Intern <i>New York, NY</i>	Jun 2025 – Dec 2025
- Mapped feature gaps across 6 competing analytics platforms; synthesized findings into a prioritized product strategy brief that directly informed stakeholder roadmap decisions. - Ran usability testing across dashboard iterations; documented friction points and validated design fixes against defined user requirements, closing the loop between research and delivery.	
Deloitte USI — Data Management Analyst <i>Bengaluru, India</i> EU & APAC Client Delivery Team	Feb 2022 – Aug 2023
- Owned weekly KPI dashboard delivery for EU partner team; translated non-technical stakeholder requirements into Power BI and Salesforce infrastructure used for executive decision-making across 8 partners. - Served as the translation layer between business users and engineering; ran iterative feedback rounds to surface unstated requirements, reducing revision cycles and aligning delivery to actual user needs. - Built and maintained ETL pipelines in SQL and Python feeding live partner dashboards, enforced data quality standards across extraction, transformation, and validation stages.	
GlobalData Research Center — Economic Research Analyst <i>Hyderabad, India</i>	Nov 2019 – Feb 2022
- Built Tableau dashboard tracking 20+ economic indicators across 90+ countries; iterated on design through structured stakeholder feedback rounds, an applied product iteration process before the term existed in my title. - Tracked COVID-19 economic impact across 45+ nations, managed live data, version control, and stakeholder communication simultaneously under deadline pressure.	

KEY PROJECTS

LINX: LinkedIn Learning Redesign | Figma · UX Research & Design

2026

- Designed identity-first onboarding flow, context-aware AI chatbot, and Module 2 retention trigger (Commitment Echo), grounded in original mixed-methods research on learner abandonment. Full interactive prototypes live on Figma.

Learner Journey: OULAD Analytics | Tableau · Python

2026

- Analyzed 32,593 learners; reframed the problem from student failure to course design failure. Withdrawal rate exceeded failure rate, a finding that changes where intervention should happen. Live on Tableau Public.

Labor Market Strategic Framework | Tableau · BLS JOLTS Data

2025

- Engineered three custom workforce metrics across 126 months of BLS data. Key finding: Healthcare requires 2.3× the recruiting effort of Construction, enabling sector-specific workforce expansion decisions.

Germany Energy Transition Analysis | Python · Jupyter

2025

- 17-year regression across four industrial sectors. Electricity costs explain only 13–19% of output decline (R^2 0.13–0.19) analytical rigour over hypothesis confirmation, across 57 sources.

Thyroid Cancer Risk Prediction | R Programming

2025

- Random Forest on 3,700+ patient records; 71.74% accuracy. Radiation exposure, iodine deficiency, and family history emerged as dominant predictors.
