

PRACHI GUPTA

Data & Business Analytics | SQL · Python · Tableau · Power BI · Snowflake · R
prachigpt113@gmail.com | +1-862-231-9537 | [LinkedIn](#) | [GitHub](#) | [Live App](#)

Data & business analyst with an economics foundation and 4+ years across research, data management, and analytics; SQL, Python, dbt/Snowflake, BI dashboards, now building AI-assisted analytics tools.

PROFESSIONAL EXPERIENCE

StoriedData Inc. (GUUT) | Data Analyst Intern

Jun 2025 – Dec 2025

GUUT interactive BI platform, data visualization

New York, NY

- Analyzed account usage patterns (dashboards built, user activity, time-to-first-action) to identify churn signals, finding that the accounts with fewer than 3 dashboards in first 14 days had 3x higher churn rate.
- Conducted product walkthroughs of GUUT's BI tool to identify friction points, presented findings to product team with a recommendation to shift focus from re-engagement to early adoption.

Deloitte USI | Data Management Analyst

Feb 2022 – Aug 2023

SQL, Informatica, Salesforce, Power BI

Bengaluru, India

- Wrote SQL validation queries (using CTEs and window functions) to audit data across Informatica and Salesforce pipelines flagging nulls, duplicates, and referential integrity issues before they reached downstream reporting, reducing data validation time by ~40%.
- Designed Power BI dashboards tracking record-creation output across teams, defined the KPIs that leadership used for quarterly target feasibility assessments.

GlobalData Research Center | Economic Research Analyst

Nov 2019 – Feb 2022

PESTLE, Excel, Tableau

Hyderabad, India

- Built country-level economic analyses across 90+ economies (PESTLE), processing and validating 20+ macroeconomic indicators and forecasting with moving-average/YoY methods.

KEY PROJECTS

App Review Signal Pipeline (dbt · Snowflake · SQL, 2026):

- Built a version-controlled dbt pipeline on Snowflake transforming 4,000+ Android/iOS app reviews through a layered architecture with automated data tests and lineage documentation.
- Engineered text-based signal features to uncover a retention paradox: most-engaged users churned at 8.3% vs 6.0% for casual users, reframing the problem from disengagement to monetization-trust failure.

LINX: Conversational AI Course Recommender (Python · pandas · Streamlit, 2026 - live):

- Designed, built, and shipped an identity-first conversational recommender mapping users to research-backed archetypes, with keyword retrieval over a 1,000+ course catalog and explainable level-matched recommendations.
- Extending with embedding-based semantic retrieval (RAG) and LLM-generated explanations; validated all outbound course links.

Labor Market Strategic Framework (Python · Tableau · BLS, 2025):

- Analyzed 126 months of BLS data to quantify workforce supply-demand imbalances across industries, engineering three custom metrics: Talent Acquisition Pressure, Unfilled Rate, and Investment Risk Score.
- Key finding: Healthcare requires 2.3× recruiting effort vs. Construction providing HR teams with a data-driven basis for workforce investment decisions.

EDUCATION

Pace University, Lubin School of Business, New York, NY

May 2026

MBA, Business Analytics | GPA: 3.95 / 4

Symbiosis College of Arts and Commerce, Pune, India

Jun 2018

MA, Economics | GPA: 7.5 / 10

Delhi University, Delhi, India

Jun 2016

B.Com (Hons) | GPA: 7.9 / 10

TECHNICAL SKILLS

Analytics & Data: SQL, Python (NumPy, Pandas, Matplotlib), R, Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP), Statistical Modeling, Regression, A/B Testing, AI-assisted development

Data Platforms & BI Tools: Snowflake, dbt, Informatica, Salesforce CRM, GUUT, ETL Pipelines, Data Ingestion & Transformation
