

PRACHI GUPTA

Product & Data Analyst | SQL · Python · Figma

prachigpt113@gmail.com | +1 862-231-9537 | [Portfolio](#) | [LinkedIn](#) | [Live App](#)

Product-focused analyst moving into PM with an economics foundation, blending 4+ years across research, data, and analytics with product work spanning churn and retention analysis, experimentation, and AI-feature design.

FEATURED PRODUCT WORK

"Lost in the Learning Loop" | Independent Mixed-Methods Study

Feb 2026 – May 2026

- Ran a mixed-methods study (n=20 survey, n=4 interviews) isolating identity clarity as the key variable separating course-completers from dropouts; translated it into LINX, an identity-first onboarding redesign.
- Defined the full PRD with personas, user stories, MoSCoW, 30/60/90 metrics and built an 18-screen Figma prototype specifying a RAG-based recommendation flow.
- **Built and shipped** the live MVP (Python/Streamlit) with 1,000+ course catalog, four archetype paths.

PROFESSIONAL EXPERIENCE

StoriedData Inc. (GUUT) | Data Analyst Intern

Jun 2025 – Dec 2025

GUUT interactive BI platform, data visualization

New York, NY

- Analyzed account usage patterns (dashboards built, user activity, time-to-first-action) to identify churn signals, finding that the accounts with fewer than 3 dashboards in first 14 days had 3x higher churn rate.
- Conducted product walkthroughs of GUUT's BI tool to identify friction points, presented findings to product team with a recommendation to shift focus from re-engagement to early adoption.

Deloitte USI | Data Management Analyst

Feb 2022 – Aug 2023

SQL, Informatica, Salesforce, Power BI

Bengaluru, India

- Wrote SQL validation queries to audit data across Informatica and Salesforce pipelines, catching inconsistencies, nulls, and duplicates before they reached downstream reporting, reducing data validation time by ~40%.
- Designed Power BI dashboards tracking record-creation output across teams, defined the KPIs that leadership used for quarterly target feasibility assessments.

GlobalData Research Center | Economic Research Analyst

Nov 2019 – Feb 2022

PESTLE, Excel, Tableau

Hyderabad, India

- Built country-level economic analyses across 90+ economies using the PESTLE framework, turning quantitative indicators and qualitative research into investment-relevant insight.
- Processed national-statistics data across 20+ macroeconomic indicators; cleaning and validating with null/error checks and forecasted using moving-average and YoY growth methods, calibrated to government policy.

KEY PROJECT

App Review Signal Pipeline | dbt · Snowflake · SQL · 2026

- Built a dbt pipeline over Snowflake to analyze 4,000 App Store reviews from iOS and Android.
- Found that most-engaged users churned at 8.3% vs 6.0% for casual users, pointing to a monetization-trust problem, not a product problem, recommended shifting product focus from "re-engagement" to "trust in monetization".

EDUCATION

Pace University, Lubin School of Business

May 2026

MBA, Business Analytics | GPA: 3.95 / 4

New York, NY

Symbiosis College of Arts and Commerce

Jun 2018

MA, Economics | GPA: 7.5 / 10

Pune, India

Delhi University

Jun 2016

B.Com (Hons) | GPA: 7.9 / 10

Delhi, India

SKILLS

Analytics & Data: SQL · Python (Pandas) · Tableau · Power BI · dbt · A/B Testing

Research & Product: Mixed Methods · Moderated Interviews · Survey Design · Thematic Analysis · User Journey Mapping · PRD Writing · Agile/Scrum · Figma (Wireframing/Prototyping)

Product Strategy: KPI Development · Retention Analysis · Onboarding Design · Requirements Gathering · B2B SaaS · Product Lifecycle

GenAI Applied: LLM product design · RAG system design (specified in LINX PRD) · AI-assisted development
