

PRACHI GUPTA

Data & Business Analytics | SQL · Python · Tableau · Power BI · Snowflake · R

prachigpt113@gmail.com | +1-862-231-9537 | [LinkedIn](#) | [GitHub](#)

Data analyst with an economics foundation and 3+ years across macroeconomic research, data management, and analytics. I find what messy data is saying, make sure it can be trusted, and turn it into decisions with a Python, SQL, dbt, Snowflake, and Tableau toolkit built through an MBA in Business Analytics.

PROFESSIONAL EXPERIENCE

StoriedData Inc. (GUUT) | Data Analyst Intern

Jun 2025 – Dec 2025

GUUT interactive BI platform, data visualization

New York, NY

- Queried subscription and engagement data from Snowflake to track user churn across 50-100 B2B accounts, segmented by usage patterns and tenure to surface which clients were at highest risk of dropping off.
- Conducted product walkthroughs of GUUT's BI tool to identify friction points, cross-referenced with platform usage data and fed findings back to the product team as actionable recommendations.

Deloitte USI | Analytics Consultant, Data Management

Feb 2022 – Aug 2023

SQL, Informatica, Salesforce, Power BI

Bengaluru, India

- Monitored ETL pipelines in Informatica and Salesforce ensuring smooth movement of data between systems and writing SQL queries to catch inconsistencies before they reached downstream reporting.
- Built Power BI dashboards on record-creation output, giving leadership the quarterly numbers needed to assess target feasibility and hold teams accountable to delivery KPIs.

GlobalData Research Center | Economic Research Analyst

Nov 2019 – Feb 2022

PESTLE, Excel, Tableau

Hyderabad, India

- Constructed country-level economic reports using PESTLE framework, synthesizing quantitative indicator data with qualitative research to produce investment-relevant analysis across 90+ economies
- Owned end-to-end processing of NSO datasets across 20+ indicators, automating extraction in Python (Pandas) for API-enabled countries with null and error checks, into master sheets used for forecasting and cross-country analysis.

KEY PROJECTS

App Review Signal Pipeline (dbt · Snowflake · SQL, 2026):

- Built a version-controlled dbt pipeline on Snowflake transforming 4,000+ Android/iOS app reviews through a layered architecture with automated data tests and lineage documentation.
- Engineered text-based signal features to uncover a retention paradox: most-engaged users churned at 8.3% vs 6.0% for casual users, reframing the problem from disengagement to monetization-trust failure.

Labor Market Strategic Framework (Python · Tableau · BLS, 2025):

- Analyzed 126 months of BLS data to quantify workforce supply-demand imbalances across industries, engineering three custom metrics: Talent Acquisition Pressure, Unfilled Rate, and Investment Risk Score.
- Finding: Healthcare requires 2.3× recruiting effort vs. Construction, giving HR teams a data-driven basis for workforce investment decisions by sector.

EDUCATION

Pace University, Lubin School of Business, New York, NY

May 2026

MBA, Business Analytics | GPA: 3.95 / 4

Symbiosis College of Arts and Commerce, Pune, India

Jun 2018

MA, Economics | GPA: 7.5 / 10

Delhi University, Delhi, India

Jun 2016

B.Com (Hons) | GPA: 7.9 / 10

TECHNICAL SKILLS

Analytics & Data: SQL, Python (NumPy, Pandas, Matplotlib), R, Tableau, Power BI, Excel, Statistical Modeling, Regression, A/B Testing

Data Platforms & BI Tools: Snowflake, dbt, Informatica, Salesforce CRM, GUUT, ETL Pipelines, Data Ingestion & Transformation

Advanced Analytics: Random Forest, Predictive Modeling, Advanced Excel (Pivot Tables, VLOOKUP)
