

PRACHI GUPTA

Product & Data Analytics | SQL · Python · Figma
prachigpt113@gmail.com | +1 862-231-9537 | [Portfolio](#) | [LinkedIn](#) | [Medium](#)

Product Analyst with an economics foundation and 3+ years turning user behavior and market data into product decisions, from retention insights to AI feature design.

FEATURED PRODUCT WORK

"Lost in the Learning Loop" | Independent Mixed-Methods Study

Feb 2026 – May 2026

- Ran mixed-methods study (n=20 survey, n=4 interviews) identifying 4 behavioral archetypes; isolated identity clarity as the single variable separating completers from dropouts
- Translated research into Figma prototypes: consumer (LINX) and B2B enterprise (LINX for Teams), an identity-first onboarding layer for L&D managers
- Designed conversational AI assistant with 5 dialogue states and branching logic; architected **RAG approach** where user identity profile becomes retrieval query against course catalog
- Defined PRD with personas, user stories, MoSCoW prioritization, and 30/60/90 success metrics; delivered 18-screen **Figma prototype**, UML diagrams, and Agile Sprint 1 plan
- Pilot metrics: 13pp improvement in course completion, 15pp reduction in Week-2 abandonment (benchmarked to ATD/CIPD standards)

PROFESSIONAL EXPERIENCE

StoriedData Inc. (GUUT) | Data Analyst Intern

Jun 2025 – Dec 2025

GUUT interactive BI platform, data visualization

New York, NY

- Queried subscription and engagement data from Snowflake to track user churn across 50-100 B2B accounts, segmented by usage patterns and tenure to surface which clients were at highest risk of dropping off.
- Conducted product walkthroughs of GUUT's BI tool to identify friction points, cross-referenced with platform usage data and fed findings back to the product team as actionable recommendations.

Deloitte USI | Analytics Consultant, Data Management

Feb 2022 – Aug 2023

SQL, Informatica, Salesforce, Power BI

Bengaluru, India

- Monitored ETL pipelines in Informatica and Salesforce ensuring smooth movement of data between systems and writing SQL queries to catch inconsistencies before they reached downstream reporting.
- Built Power BI dashboards on record-creation output, giving leadership the quarterly numbers needed to assess target feasibility and hold teams accountable to delivery KPIs.

GlobalData Research Center | Economic Research Analyst

Nov 2019 – Feb 2022

PESTLE, Excel, Tableau

Hyderabad, India

- Constructed country-level economic reports using PESTLE framework, synthesizing quantitative indicator data with qualitative research to produce investment-relevant analysis across 90+ economies
- Owned end-to-end processing of NSO datasets across 20+ indicators, automating extraction in Python (Pandas) for API-enabled countries with null and error checks, into master sheets used for forecasting and cross-country analysis.

KEY PROJECT

App Review Signal Pipeline | dbt · Snowflake · SQL

2026

- Analyzed 4,000+ App Store reviews for Headspace and Strava to surface product signals (paywall friction, churn intent, engagement patterns) using a dbt pipeline on Snowflake.
- Product insight: Most-engaged users churned at 8.3% vs 6.0% for casual users, shifted product team's focus from "re-engagement" to "trust in monetization".

SKILLS

Analytics & Data: SQL · Python (Pandas) · Tableau · Power BI · dbt · A/B Testing · Regression Analysis

Research & Product: Mixed Methods · Moderated Interviews · Survey Design · Thematic Analysis · User Journey Mapping · PRD Writing · Agile/Scrum · Figma (Wireframing/Prototyping)

Product Strategy: KPI Development · Retention Analysis · Onboarding Design · Requirements Gathering · B2B SaaS · Product Lifecycle

GenAI Applied: RAG architecture · LLM product design · Prompt Engineering (used in LINX)
