

PRACHI GUPTA

Business & Data Analyst | Translating Data into Decisions | SQL · Python · Tableau · Power BI
Harrison, NJ | prachigpt113@gmail.com | +1-862-231-9537 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Medium](#)

OPT authorized · STEM extension eligible (36 months)

EDUCATION

Pace University, Lubin School of Business — New York, NY <i>MBA, Business Analytics GPA: 3.95</i>	May 2026
Symbiosis College of Arts and Commerce — Pune, India <i>MA Economics GPA: 7.5 / 10</i>	June 2018
Delhi University — Delhi, India <i>B.Com (Hons) GPA: 7.9 / 10</i>	June 2016

TECHNICAL SKILLS

Analytics & Data: SQL · Python (Pandas, Matplotlib) · R · Tableau · Power BI · Excel · Statistical Modelling · Regression Analysis · A/B Testing

Product & Methods: PRD Writing · Agile/Scrum · Sprint Planning · B2B SaaS · UML · KPI Development · ETL · UAT · Competitive Analysis · Stakeholder Management · Requirements Gathering

Design & Dev: HTML · CSS · JavaScript · Figma · Salesforce CRM · Responsive Design

Generative AI: Familiar with LLM-based product design and RAG architecture principles; applied in LINX AI assistant concept. Tools: Claude · ChatGPT · Prompt Engineering

Certifications: Google Analytics Certified | Bloomberg Market Concepts

RELEVANT COURSEWORK

Visual Analytics | Predictive Analytics | Business Analytics and Statistics | Marketing Research | Strategic Decisions | Managerial Economics | Database Management Systems | Managing Operations & Projects | Leading & Managing Teams

PROFESSIONAL EXPERIENCE

StoriedData Inc. (GUUT) — Data Analyst Intern Jun 2025 – Dec 2025
New York, NY

- Conducted competitive analysis across 6 analytics platforms against defined focus areas; produced a prioritized feature gap brief for stakeholder roadmap review.
- Evaluated platform features from a user perspective; produced tutorial documentation identifying and resolving navigation friction points for client-facing use.

Deloitte USI — Data Management Analyst Feb 2022 – Aug 2023
Bengaluru, India | EU & APAC Client Delivery Team

- Ensured weekly KPI dashboard delivery for 8-person EU partner team; validated data accuracy and flagged errors prior to distribution, supporting executive decision-making across Power BI and Salesforce.
- Supported alignment between business requirements and data delivery; surfaced data discrepancies and process errors to maintain integrity across live partner dashboards.
- Administered ETL pipeline operations in SQL and Informatica supporting new client onboarding; enforced data quality standards across extraction, transformation, and validation stages.

GlobalData Research Center — Economic Research Analyst Nov 2019 – Feb 2022
Hyderabad, India

- Built and maintained Tableau dashboard tracking 20+ economic indicators across 90+ countries; incorporated stakeholder-requested filters through structured feedback rounds, an applied product iteration process.
- Synthesized macroeconomic data into monthly executive research reports consumed by institutional clients; developed repeatable templates that cut report production time across the team.

- Tracked COVID-19 economic impact across 45+ nations; managed live data updates, version control, and stakeholder communication under high-frequency publishing deadlines.

KEY PROJECTS

LINX for Teams — B2B Product Concept | *PRD · Agile · UML · Figma* 2026

- Wrote end-to-end product documentation for an enterprise L&D SaaS concept: PRD with MoSCoW prioritization and user stories, Agile Sprint 1 plan with story point estimates across four roles, and UML use case + activity diagrams - directly demonstrating requirements gathering, sprint planning, and stakeholder alignment.
- Designed Linx, a **conversational AI assistant** with five dialogue states and branching diagnostic logic; defined functional requirements, conversation flow, and fallback behavior grounded in original user research. Architecture concept follows a **RAG approach**: identity profile from onboarding drives course catalog retrieval, with LLM-generated recommendations grounded in real catalog data.
- Defined 30/60/90 success metrics anchored to ATD and CIPD benchmarks; 18-screen Figma prototype demonstrates B2B system design across three actor personas.

Learner Journey: OULAD Analytics | *Tableau · Python* 2026

- Analyzed 32,593 Open University learners; identified withdrawal rate exceeded failure rate, reframed the problem from student underperformance to course design failure. Built 3-part Tableau story with prioritized retention recommendations. Live on Tableau Public.

Portfolio Website | *HTML · CSS · JavaScript* 2026

- Designed and built responsive portfolio from scratch; implemented sliding pill toggle for project filtering, JavaScript resume dropdown, mobile-first layout, and SEO setup including Google Search Console, sitemap, and custom OG image. Fully self-taught.

Labor Market Strategic Framework | *Tableau · BLS JOLTS Data* 2025

- Analyzed 126 months of BLS JOLTS data; engineered three custom metrics; Talent Acquisition Pressure, Unfilled Rate, Investment Risk Score, revealing Healthcare requires 2.3× recruiting effort vs. Construction. Interactive dashboard enabling data-driven workforce planning decisions.

Germany Energy Transition Analysis | *Python · Jupyter* 2025

- 17-year cross-sector regression study across chemicals, metals, and paper industries. Electricity costs explain only 13–19% of manufacturing output decline (R^2 0.13–0.19); policy-driven tax component showed weaker relationships than total electricity costs. Prioritized analytical rigor over hypothesis confirmation across 57 sources.

Thyroid Cancer Risk Prediction | *R* 2025

- Built Random Forest classification model on 3,700+ patient records; achieved 71.74% accuracy. Identified radiation exposure, iodine deficiency, and family history as dominant predictors. Validated model performance against holdout set.
